

MafrOOK Kuthpudeen

Junior Software Engineer | MERN Stack Developer
MafrOOKtkc@gmail.com | +91 8925661541 | Tamil Nadu, India
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Junior Software Engineer with 1 year of experience developing and maintaining MERN stack web applications for internal business operations. Experienced in React.js, TypeScript, Node.js, Express.js, MongoDB, REST APIs, authentication systems, role-based access control, and admin-facing workflow management modules. Familiar with debugging production issues, API integration, and Agile-based development workflows.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Responsive Design, React Query
Backend: Node.js, Express.js, REST API Development, JWT Authentication, Role-Based Access Control
Database: MongoDB, Mongoose, MySQL Basics
Tools: Git, GitHub, Postman, VS Code, Chrome DevTools, npm, Firebase Hosting, Vercel, GitHub Actions

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Statlight Software Solutions

July 2025 – Present
Bengaluru, India | Hybrid

- Developed and maintained modules for a loan management platform supporting customer onboarding, application tracking, approval workflows, and administrative operations.
- Contributed to Angular-to-React migration by refactoring legacy UI modules into reusable React components for improved maintainability and consistency.
- Implemented admin-facing interfaces for loan lifecycle workflows including Pending, Approved, Rejected, and Closed application states.
- Integrated frontend applications with REST APIs for handling authentication, loan records, workflow updates, and user-specific data access.
- Managed API state handling and caching using React Query to reduce redundant API requests and improve frontend data synchronization.
- Built RESTful APIs using Node.js and Express with JWT authentication and role-based access control for secure workflow management.
- Designed MongoDB schemas using Mongoose with validation rules, audit logging, and indexing for structured loan application data handling.
- Debugged and resolved issues related to API responses, form validation, authentication flows, and frontend data rendering.
- Participated in Agile sprint planning, code reviews, and CI/CD-related workflows using GitHub Actions for deployment automation.

Technical Trainer - Apprenticeship

A1 Technoskill / Livewire Institutions

October 2024 – February 2025
Mayiladuthurai, India

- Conducted practical training sessions on JavaScript, Java, Python, and full-stack web development fundamentals.
- Guided students in developing CRUD applications, authentication systems, REST APIs, and database-integrated projects.
- Assisted students in debugging frontend-backend integration issues and improving application logic implementation.

PROJECT

AccessVault - Role-Based Credential Management System

React.js, Node.js, Express.js, MongoDB, JWT,

bcrypt

- Developed a role-based credential management system supporting Admin, Manager, and Viewer access levels.
- Implemented JWT authentication and bcrypt-based password hashing for secure login and protected resource access.
- Built REST APIs for managing credentials, users, permissions, and audit logging workflows.
- Designed MongoDB schemas and validation logic using Mongoose for user and credential management.

CERTIFICATIONS

HackerRank: JavaScript (2025), Java (2025)

AWS Academy: Cloud Foundations (2024)

freeCodeCamp: Responsive Web Design (2024)

EDUCATION

Bachelor of Engineering - Computer Science and Engineering
E.G.S. Pillay Engineering College, Nagapattinam

CGPA: 8.1/10
2020 – 2024
